

## DATA STORAGE AND DASHBOARD IN THE CLOUD

**Store4Me is aimed at managers of industrial systems or equipment.**

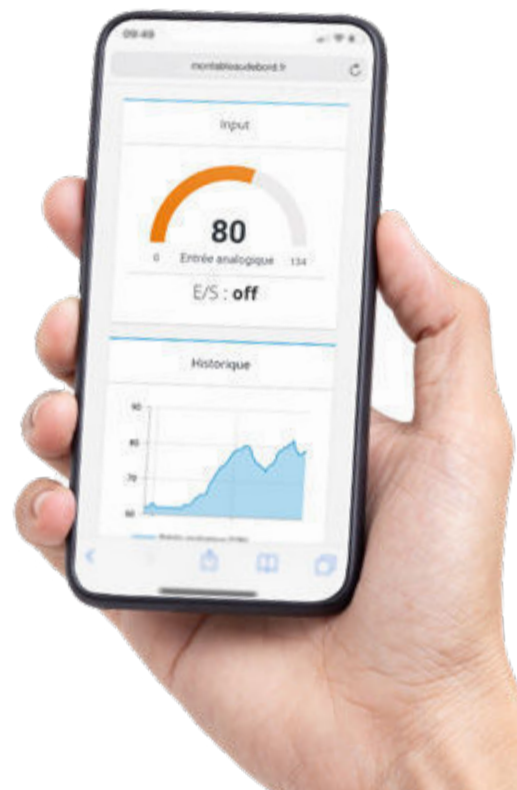

This RAS or IPL box software option allows the collection and storage in the Cloud of industrial data.

These data are easily accessible for the creation of dynamic dashboards from tools such as Excel, Power BI, Google Studio ...

Store4Me also gives you free access to EticDISPLAY solution allowing easy creation of a dynamic dashboard that can be consulted from a PC, a tablet or a smartphone (HTTPs).

### Store4Me solution

- Secure data storage in the cloud
- Compatible with RAS & IPL
- Simple and secure access to stored data (HTTPs)
- Compatible with Excel, Power BI, Google Data Studio, ...
- Free access to EticDISPLAY solution

## THE DATA STORAGE OFFER

Etic Telecom offers **data storage space** for the long-term consultation of the dashboard.

Depending on the use case, the volume of data to be stored can be large. Etic Telecom has therefore created **3 offers or «Data Pack»** to meet your different needs.

CHOICE OF THE PACK TO INSTALL ON THE BOX		SUBSCRIPTION DURATION	
		1 year	5 years
QUANTITY OF POINTS STORED PER BOX	0,5 million points	Pack data <b>standard 1</b>	Pack data <b>standard 5</b>
	5 millions points	Pack data <b>silver 1</b>	Pack data <b>silver 5</b>
	50 millions points	Pack data <b>gold 1</b>	Pack data <b>gold 5</b>

**Example:** a box collects the values of 5 variables every 10 minutes. One year of historization costs 0.26 million points.

## ADVANTAGES

### Solution available on RAS & IPL

This software feature can be installed on any Machine Access Box (RAS) or Industrial Routers (IPL) commercialized by Etic Telecom.

### Solution compatible with the remote maintenance and monitoring M2Me

EticDisplay together with the M2Me solution offers a comprehensive, secured and simple monitoring solution with dashboard visualization and remote maintenance of the industrial process.

### Solution compatible with partner products

EticDISPLAY is compatible with gateways partnering with Etic Telecom.

### Creation of customized WEB pages

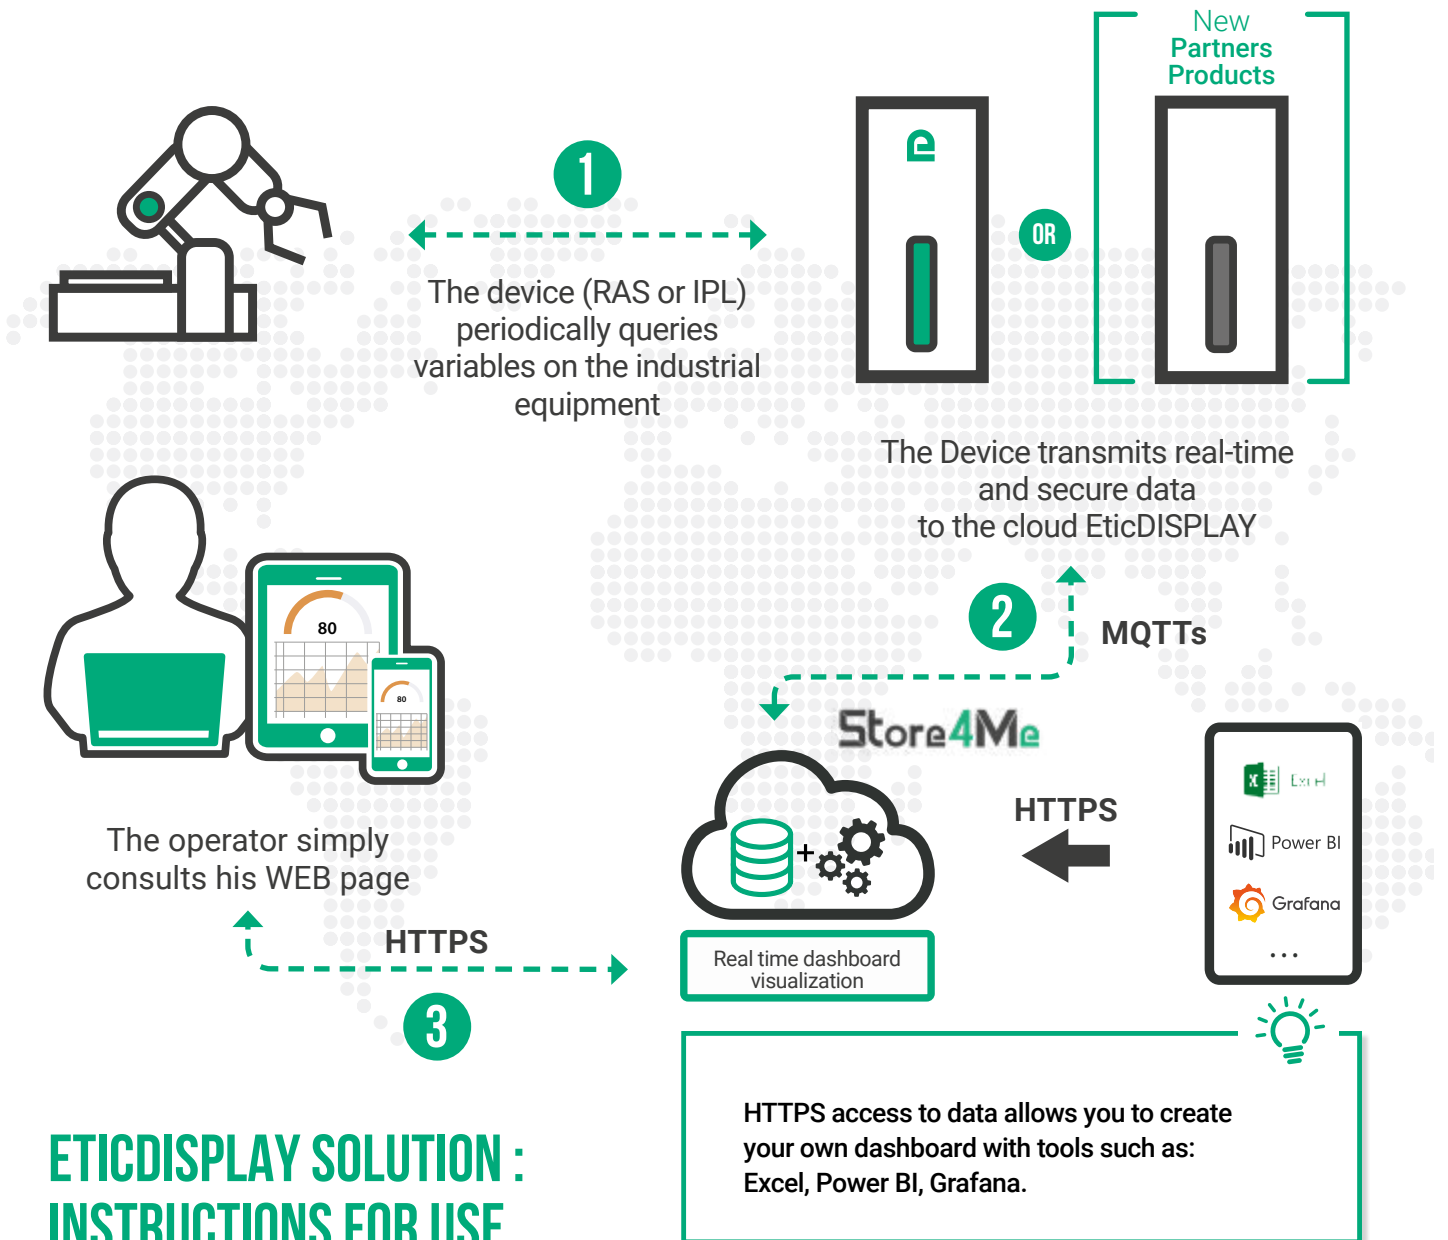

On the basis of specifications, Etic Telecom produces a dashboard for visualizing industrial data. Etic telecom also provides the toolbox allowing the partner to create his own WEB pages.

### Consulting the dashboard without specific tools

Without the installation of additional software on your terminal (PC, smartphone, tablet PC), you can securely access your dashboard using a browser (Chrome, Firefox, Edge, Safari, ...).

# ETICDISPLAY DASHBOARD SOLUTION

## ETICDISPLAY SOLUTION : INSTRUCTIONS FOR USE

- 1 Step 1: creation of the dashboard in the Cloud**

  - My EticDISPLAY offer:  
Etic Telecom creates from specifications your personalized dashboard.
  - Starterkit EticDISPLAY offer:  
Etic Telecom provides free of charge a starter kit, a real toolbox allowing you to create your own dashboard.
- 2 Step 2: choice of the data pack adapted to the need**

You determine your data storage need and opt for a standard, silver or gold pack.

- 3 Step 3: you renew your data pack**

You are notified shortly before the deadline that the data subscription of your box ends. You go back to step 2.
